

10

Benefits of a master specification system

over Microsoft Word

Why the use of a digital master system for writing and managing specifications is better than using a tool such as Microsoft Word.

1. Contextual options

Providing you with relevant options to select from.

2. Contextual guidance

Associated technical guidance supporting your decisions.

3. An enforced structure

Ensure that specification information is in a consistent structure.

4. Improved team work

Collaborate around a single source of information.

5. Knowledge capture

Add your own practice knowledge at a central location.

6. Always up-to-date

Lower the risk of referencing outdated standards.

7. Quality control

Configure who can access and amend the specification.

8. Task-specific functionality

Software functionality designed for specification writing.

9. A clear audit trail

Understand which team member made which decision.

10. Digital ecosystem

Models and specifications seamlessly connected.
