

Uniclass 2015

Pr – Products Table v1.21

January 2021

General changes

We have been working with the team at the Palace of Westminster who are managing the refurbishment project and as a result have several new codes and classifications for furniture and fittings. We have also taken the opportunity to rationalize some of the sections in the furnishings group. Our work with the Environment Agency has also resulted in some new codes and classifications. We have also received feedback in connection with the group Pr_75_75 arrangement and as a result we have relocated sections of products to more appropriate locations. See below for details.
