SL – Spaces/ locations Table v1.19

January 2021

General changes

We have been working with the Department for Education to establish appropriate Spaces for schools and as result there are a number of new codes and classifications added to meet these requirements. We have also been working with the Environment Agency and this work has resulted in several new codes and classifications and some reorganization between the tables. Finally, our work with the WICHHS group of BIM4Water has resulted in the addition of several new codes in connection with wastewater treatment. See below for details.
