Pr – Products Table v1.22

April 2021

General changes

We have continued to work with the Environment Agency, and have added some new codes and classifications to map to their data reference library. Other users have highlighted missing classifications which we are pleased to add to the table, including ‘Laboratory containment isolators’, ‘Heat pump water heaters’, ‘Fire zone diagrams’ and ‘PI, PD and PID controllers’. In order to accommodate a new mineral board, we have had to split this section into four groups. This means that several classifications have been moved to new sections and recoded. See below for details.
