

Uniclass 2015

Pr – Products Table v1.23

July 2021

General changes

We have been advised that our references to GRP and GRC were incorrectly written out in the classifications throughout the Products table; as a result we have corrected all of these classifications. Users have requested new classifications, which have been added, and have highlighted some duplications and errors, which have been amended. Our work with the representatives of the water industry has led to some clarification of the use of 'public' and 'packaged', which has led to several classifications being corrected. See below for details.
