

Uniclass 2015 Ss – Systems Table v1.24

October 2021

General changes

We have taken the opportunity align the bridge structure classifications with the Elements/ functions (EF) table, and moved them to the structure group of the Systems table. We have also been working with a company that designs and installs fish farms, and we have added some new Aquaculture codes to the table. The lift systems have also been amended to reflect current standards. See below for details.
